

Product Highlights

Sommario

- 1 – “Stripes Texture” Series upgrade.
- 2 – New “Oxide” Series.
- 3 – Full glossy Metallic effect “finger print” resistant.
- 4 –ST Colour Card Collections.

1 – “Stripes Texture” Series upgrade.*

"Stripes Texture" series, initially proposed as a collection of 5 river-textured polyester finishing, has been now extended to 9 items. The main characteristic of this Series are the visible “stripes” on the top of the film structure. The colours in this series include black, green, blue and red, purple and Yellow.

The following table shows, in order, the codes of the series depicted in the image below.

PO-878-M128-001	PO-878-M128-002	PO-878-M303-001
PO-878-M303-002	PO-878-M517-001	PO-878-M517-002
PO-878-M629-001	PO-878- M629-002	PO-878-M990-001

The colour cards of this series will be available soon.

2 – New “Oxide” Series.*

The "Oxide" Series is a collection of 16 textured, Qualicoat approved polyester coatings. The collection offers different colour shades, from gray to green, from beige to brown. The special chromatic structure of the coatings, especially in brown tones, call to mind the characteristic appearance of the oxidized iron surface.

The following table shows, in order, the codes of the series depicted in the image below.

P2-068-S813-001	P2-068-S813-002	P2-068-S960-003	P2-068-S960-002
P2-068-S630-004	P2-068-S630-003	P2-068-S630-001	P2-068-S630-002
P2-068-S630-001	P2-068-S966-002	P2-068-S966-001	P2-068-S966-003
P2-068-S960-001	P2-068-S816-002	P2-068-S816-001	P2-068-S816-003

The colour cards of this series will be available soon.

3 – Full glossy Metallic effect “finger print” resistant.

Following the request of several customers, ST Powder Coatings Laboratories have developed two new metallic bonded powders. The main features of these powders are the full-glossy steel-like appearance and the high resistance to “finger print” stains (problem caused by excessive handling of the article).

The image below shows an item coated with the product P0-858-C739-B01 (the second coating developed is P0-858-C739-B02).

The metallic pigments used in the preparation of these coatings are also characterized by a good resistance to oxidation but they are NOT suitable for outdoor use.

4 – ST Colour Card Collections.

ST Powder Coatings has prepared, during the last months, some Colour Card Collections arranged according to product line and field of application. For a better understanding of users, in the following table is briefly summarized the main features of the colour card collections:

	<p>Series Name: SAHARA Chemistry: POLYESTER Approvals: QUALICOAT class 1, GSB Standard Appearance: Matt Smooth Number: 34 Features: Powder coatings for outdoor use, suitable for Architectural application.. Twenty-one items of this collection are available on stock, the others on request.</p>
	<p>Series Name: SUN METAL BRIGHT Chemistry: POLYESTER Approvals: Qualicoat ONLY for P2-858-G906-004 and P2-858-G907-010 Appearance: Metallic smooth or textured. Number: 20 Features: Powder coatings for outdoor use, suitable only for industrial or general purpose. Nine items of this collection are available on stock, the others on request.</p>

	<p>Series Name: <i>MOON METAL BRIGHT</i> Chemistry: EPOXY, EPOXYPOLYESTER Approvals: NO Appearance: Metallic smooth or textured. Number: 22 Features: Powder coatings for indoor use. Sixteen items of this collection are available on stock, the others on request.</p>
	<p>Series Name: <i>PEARL SATIN</i> Chemistry: POLYESTER Approvals: QUALICOAT class 1, GSB Standard Appearance: Semiglossy metallic, smooth or textured Number: 22 Features: Powder coatings for outdoor use, suitable for Architectural application. Nineteen items of this collection are available on stock, the others on request.</p>
	<p>Series Name: <i>STAR DUST MARBLE</i> Chemistry: POLYESTER Approvals: QUALICOAT class 1, GSB Standard Appearance: Marble Number: 19 Features: Powder coatings for outdoor use, suitable for Architectural application. Fourteen items of this collection are available on stock, the others on request.</p>
	<p>Series Name: <i>METEORA</i> Chemistry: EPOXYPOLYESTER Approvals: NO Appearance: Textured Number: 16 Features: Economical series based on raw materials conveniently chosen to optimally balance general properties and cheapness. The series is suitable to coat items for indoor use where the economical aspect takes precedence over all other aspects.</p>
	<p>Series Name: <i>VULCANO</i> Chemistry: EPOXYPOLYESTER Approvals: NO Appearance: River Textured Number: 29 Features: Powder coatings for indoor use. Twenty-two items of this collection are available on stock, the others on request.</p>
	<p>Series Name: <i>NEBULOSA</i> Chemistry: POLYESTER Approvals: QUALICOAT class 1, GSB Standard Appearance: Semiglossy smooth Number: 36 Features: Powder coatings for outdoor use, suitable for Architectural application. Twenty-one items of this collection are available on stock, the others on request.</p>
