

STRIPP[®]-M2G

PRODUCT SHEET

STRIPP[®] IS THE REGISTERED PRODUCTNAME OF ENVIROSTRIPP CHEMICALS AB'S ENVIRONMENTALLY-COMPATIBLE AND EASILY BIOLOGICALLY DEGRADABLE PRODUCTS FOR REMOVAL OF INDUSTRIAL PAINT AND ADHESIVES.

AREAS OF USE

General	Stripp-M2G is a unique water based product, which is as effective as fully solvent based equivalents. The patented formula combines function and environmental characteristics in a completely new way, reducing emissions to air and water. The content of VOC-components in the ready-mixed new product is <15 weight %.
Paint, adhesive, rubber, plastic	Stripp-M2G is an effective cleaning agent intended for degreasing and removal of oxide, soot and coke.
Substrate	Stripp-M2G may have a affect on paint, adhesive and some plastics.

PRODUCT DESCRIPTION

Contents	Stripp-M2G is water based with the addition of benzyl alcohol and surfactants.
Composition	Stripp-M2G is supplied as a concentrate and is mixed with regular water. The final mixture forms a micro emulsion that is homogeneous at >20°C.
Conditioning	When used as a wash bath Stripp-M2G should be conditioned with regular water and fresh liquid when necessary.
Properties	Stripp-M2G is easily biologically degradable.

PRACTICAL INFORMATION

Mixing	Concentrated Stripp-M2G is mixed with regular water in the ratio 1:1 (1 part M2G and 1 part water). Stripp-M2G can be diluted more or less depending on the degree of contamination.
Equipment	Stripp-M2G is used in vessels of steel or chemically resistant plastic (PE, PP). Stripp-M2G can advantageously be used in combination with ultrasound.
Temperature	Stripp-M2G is used cold, but also heated up to 50°C. Ensure for good ventilation with heated fluid.
Application	Stripp-M2G is applied by means of spraying or dipping. The cleaning time varies depending on type of contamination (type and amount of dirt). Longer wash cycles are recommended for heavy soiling. Rinse cleaned parts with water.
Maintenance	The bath has a fundamentally good service life but this can be further extended with continuous maintenance in the form of cleaning and addition of fresh liquid.

Physical properties

Boiling point	>100°C
Flash point	>100°C
pH	~11
Labelling	Irritating
Stripp-M2G is chemically and thermally stable.	
Stripp-M2G is easily biologically degradable.	

Safety instructions

Irritating –Irritating to eyes, respiratory and skin.
Use suitable protective equipment, however, a minimum of protective gloves and protective goggles.
Ensure for good ventilation.
