

Suspension and masking technology  
for the surface finishing industry

**EPIFATECH®**  
*makes surface to content*

A close-up, slightly blurred photograph of a man with a beard and mustache, wearing a dark suit jacket over a light-colored shirt. He is looking off to the side with a thoughtful expression. In the background, there are architectural blueprints or drawings pinned to a wall, suggesting a professional engineering or design environment.

# Together

We have no doubt that our customers have full control of how they achieve maximum flow efficiency. Our task is to provide them with the means to achieve that level optimally. At Epifatech we recognise and appreciate the expertise and experience of our customers. Our aim is to use our knowledge and capability to help them progress. It has never been a question of delivering a mass-produced product. What we are seeking is a partnership with our customers to achieve a specially adapted solution.

Cooperation begins at an early stage where we examine the customer's production process. How many parts need to be finished at the same time? How much space is available? How can the suspension systems be transported and stored?

The preliminary study is a crucial part of the project as we acquire an understanding of the needs of the customer. This then gives us a basis for presenting a design that is best suited to each assignment. That is how we and our customers work together to achieve common goals.

# ideas

When developing a new suspension system, the starting point is determining how many parts will need to be placed on each frame and how it will affect the finishing technique.

We have experience of suspension systems that work in different ways depending on the finishing technique. A part could be electroplated to achieve overall protection against corrosion. The same part could then move on to be powder coated – but only certain sections. The other sections need to be masked. In the past, each part was masked manually before coating, which proved extremely time-consuming. A manual system was also less precise. With a solution from Epifatech, the same design can be used for both complete electroplating and partial powder coating. This not only means that a great deal of extra masking can be avoided, it also eliminates the need to move parts to a new frame when moving on to the next finishing stage.

By thinking innovatively we identify new approaches and deliver solutions that function down to the part level. Solutions that will last a long time and which, with the application of logistics thinking, are adapted to the customer's production system and their specific requirements. Optimised on every level.

# come to life

Surface finishing can differ quite significantly – and on many levels. Quality stipulations presented by our customers are becoming increasingly stringent. This makes stricter demands on the finishing and the suspension system. We ensure that we see the totality in each project and we allow the end-product to govern the way we work.

Our suspension systems help make the process as smooth and optimised as possible from start to finish. A slightly more advanced suspension system could also make it easier to synchronise the different phases. By doing so, our customers have better control over the entire process through to the finished product at the end-customer.

We maintain that the process and end-result are equally important and to underpin this principle we provide a complete concept where the outcome is based clearly on pre-set objectives.

# optimised

Optimising production is an obvious ambition when it comes to suspension systems for surface finishing. At Epifatech optimisation involves seeing the totality and resolving problems becomes an integral part of our work process. It is all about saving time by having systems that are carefully adapted to the part that is to be suspended. But it is also a question of flexibility and eliminating unnecessary handling. If, for example, suspension systems are used at different stages, it could be important to store the systems optimally to save on space. It could also be a question of developing an efficient process for sending away systems to have paint burnt off. With several systems hanging on the same frame, they can be easily burnt together in a considerably shorter period of time than if they were handled individually.

By focusing on the process as a whole and not just the actual suspension arrangement, we can provide added value for the customer, which in the final analysis saves time and offers long-term sustainability.

# and quality driven.

We believe in a quality-driven work process. With our highly stable suspension systems, all the components are fixed, allowing full control of the dimensions and distance between the parts. When suspended, the parts hang in the same way every time. Not only does this simplify the process, it is a vital requirement when a system is robotised.

Quality is also a matter of gaining the trust of the customer. Ensuring that our solutions can be adapted to all types of projects and operations is a priority. To achieve this, we have not locked ourselves into a standard range. Instead we strive in every way to be flexible and by doing so deliver products based on needs. The result is that we can offer complete, optimised solutions without them necessarily costing more.

By immersing ourselves in our customer's production process, logistics and storage systems we build up a solid partnership with a level of quality that is consistently high throughout the whole process.

With us  
optimised  
is standard.

## SHAPING COLLABORATION

At Epifatech we develop and manufacture suspension systems for electroplating and powder coating. We also offer a wide range of masking options. We have been operating for more than 40 years and we have more experience in the industry than the majority of our competitors.

In cooperation with our customers we have produced effective solutions in a range of areas and we are now represented throughout the whole of Europe.

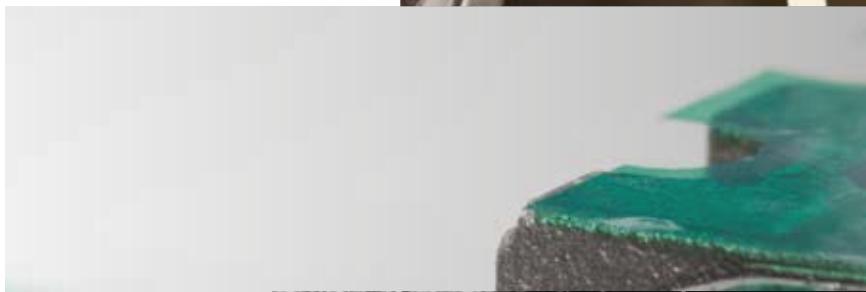

We have a wide assortment of hooks, fittings, masking equipment, plugs and other products although our main strength lies in our flexibility. Working closely with our customers, we constantly seek to find specially adapted solutions. We usually say that we have optimised solutions as standard. By this we mean that it should not need to cost more to have an adapted system than it would to buy ready-made standard solutions.

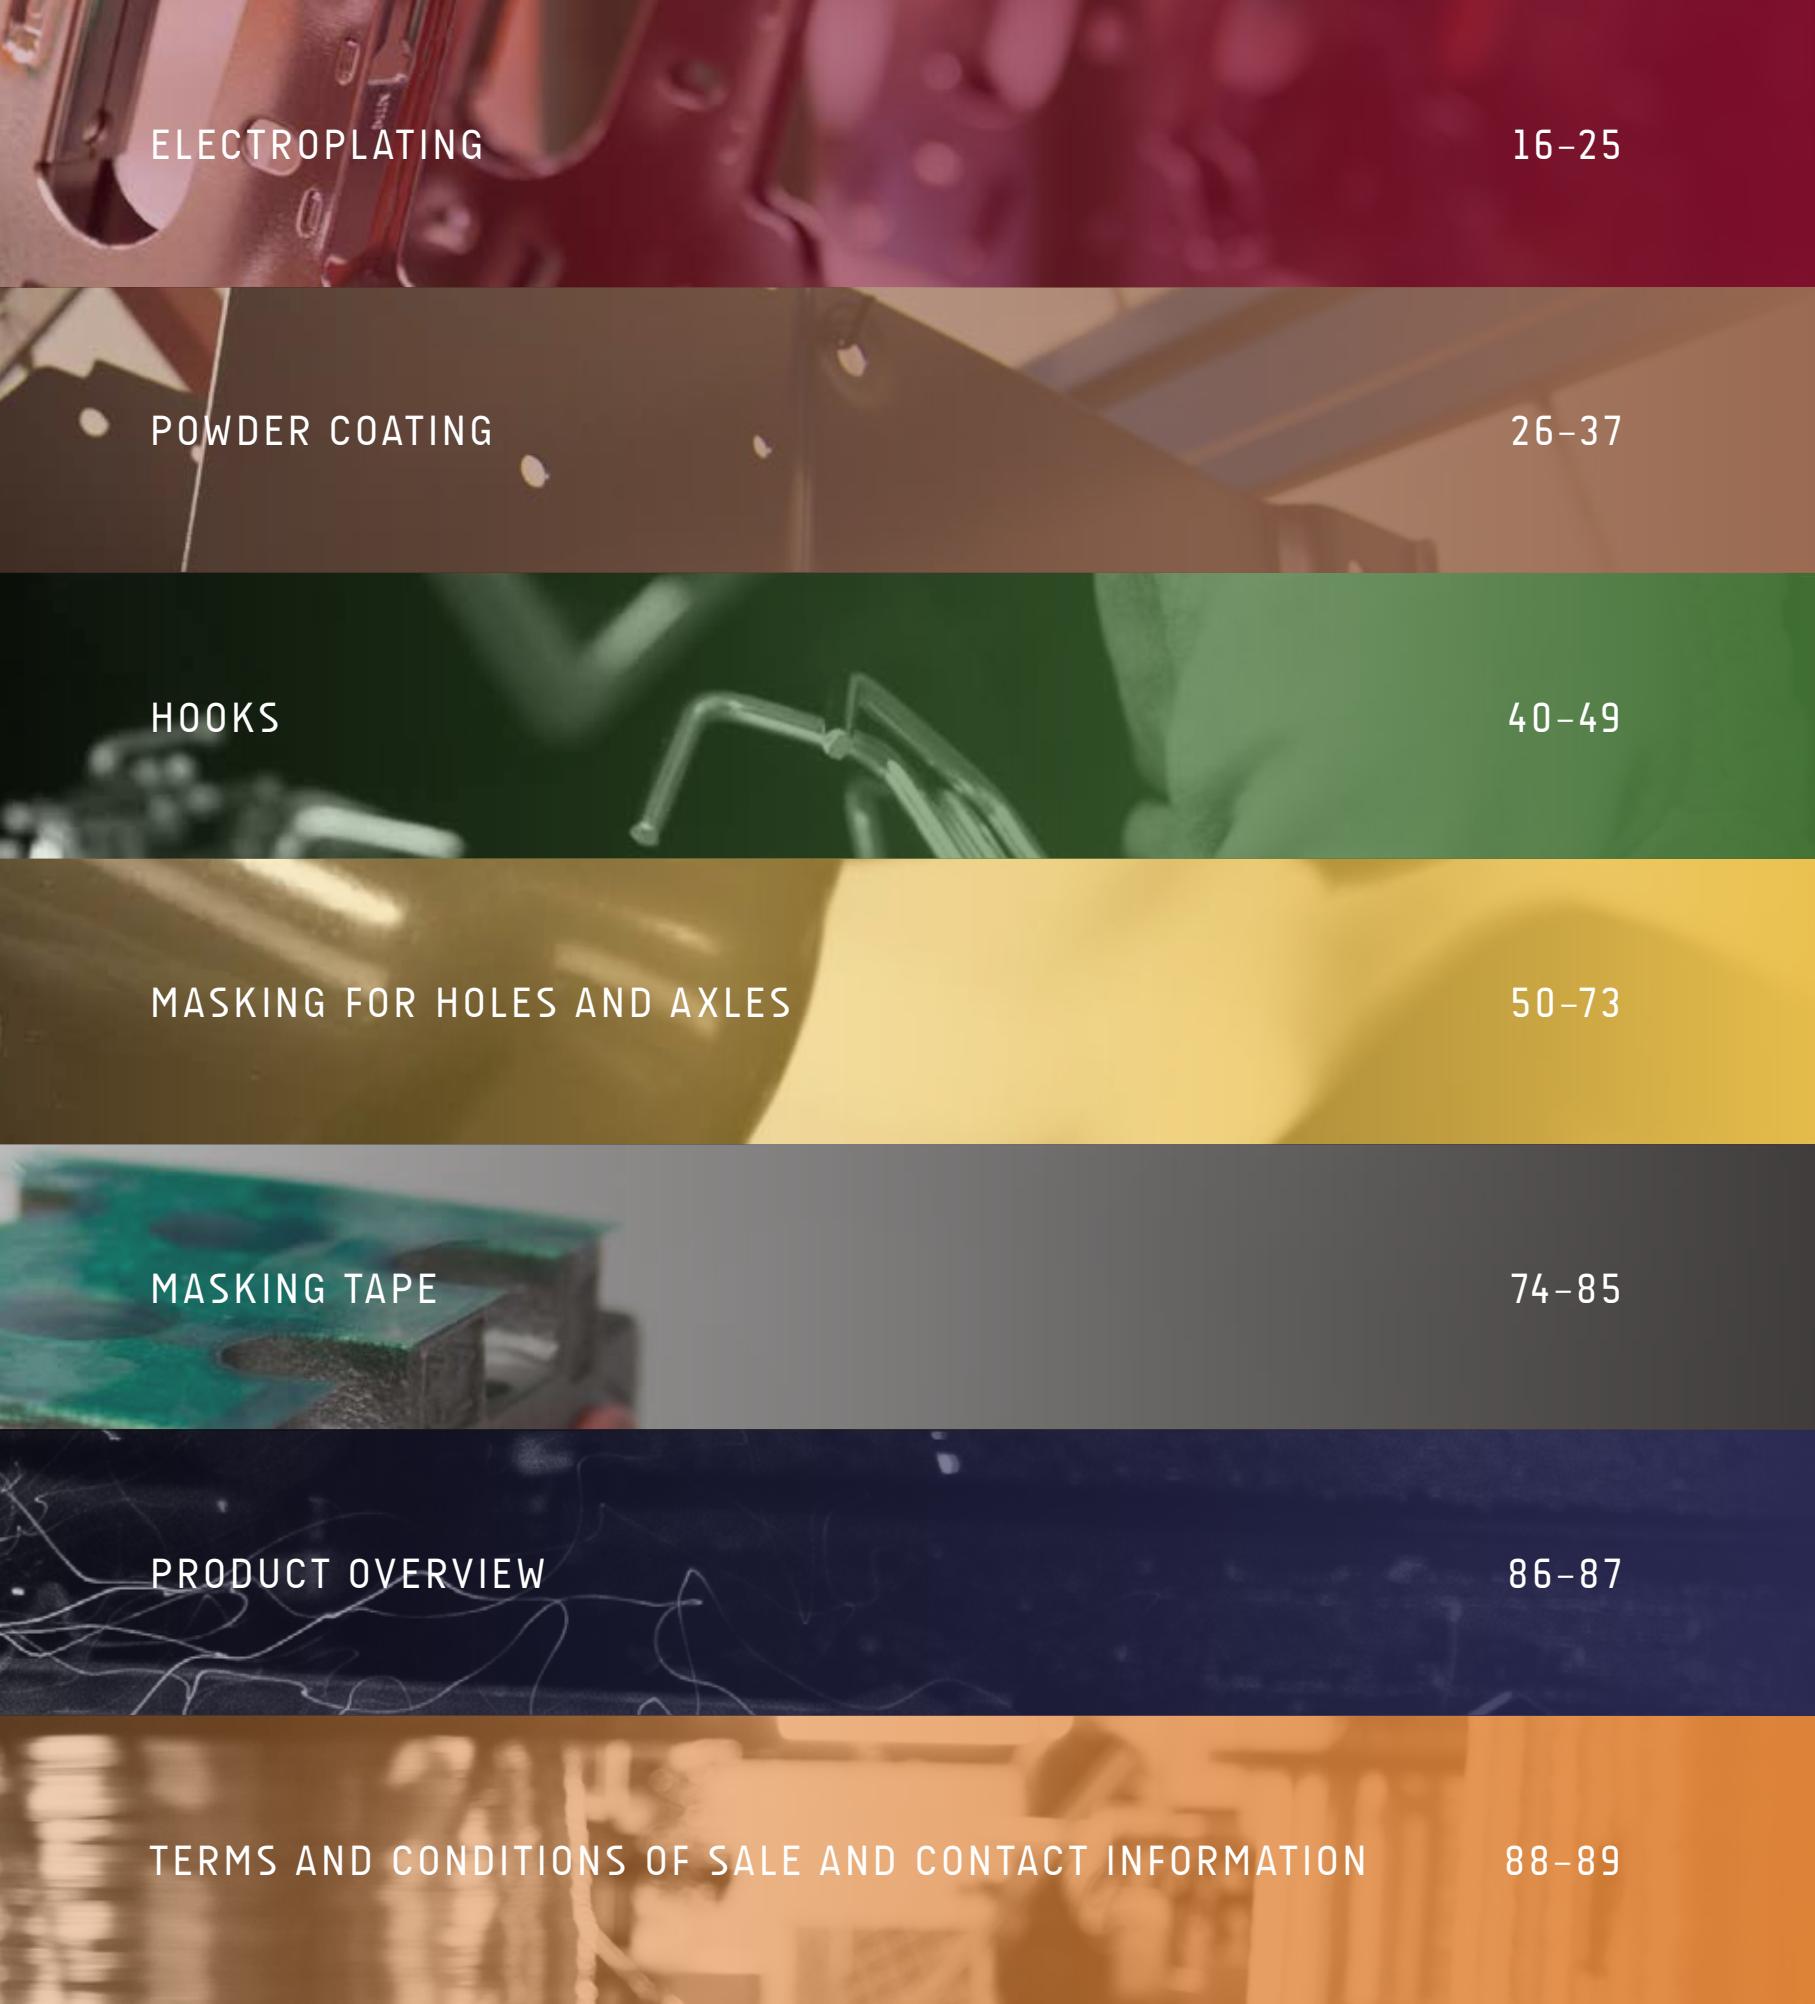

Not only are we committed, we are also competitive. This is enhanced by the open cooperation we strive for with our customers. We have worked with the majority of our customers for a long time, which is a clear sign of our mutual success.

# Contents

## FIND WHAT YOU REQUIRE IN OUR PRODUCT RANGE

We have divided our product range into five areas. You will find products with both standard dimensions and with dimensions that are adapted entirely to your needs.

The background of the page features a collage of six images related to metalworking and finishing. Top left: A close-up of a red electroplated part. Top right: A dark surface with a textured pattern. Middle left: A green surface with two metal hooks attached. Middle right: A yellow surface with a metal hook. Bottom left: A green surface with a circular hole being masked. Bottom right: A dark surface with a complex wire or cable assembly.

# Electroplating

16-25

## UNIVERSAL SUSPENSION SYSTEM

Our universal suspension system for electroplating. The flexibility of the system optimises space and ensures that both the width and depth of the vat can be utilised. The levels that are not used are shielded against coating.

### A: Conductor

The conductor for the system is available in the required length and with the required number of levels

### B: Extended strut

The strut can be extended to bring it closer to the anodes.

### C: Centred strut

The strut is used to centre the parts in the vat.

### D: Fixed hooks

In the universal system, hooks are made entirely according to customer wishes and are fixed into the system. This results in a highly stable suspension system that is optimised to fit into the customer's production system effectively.

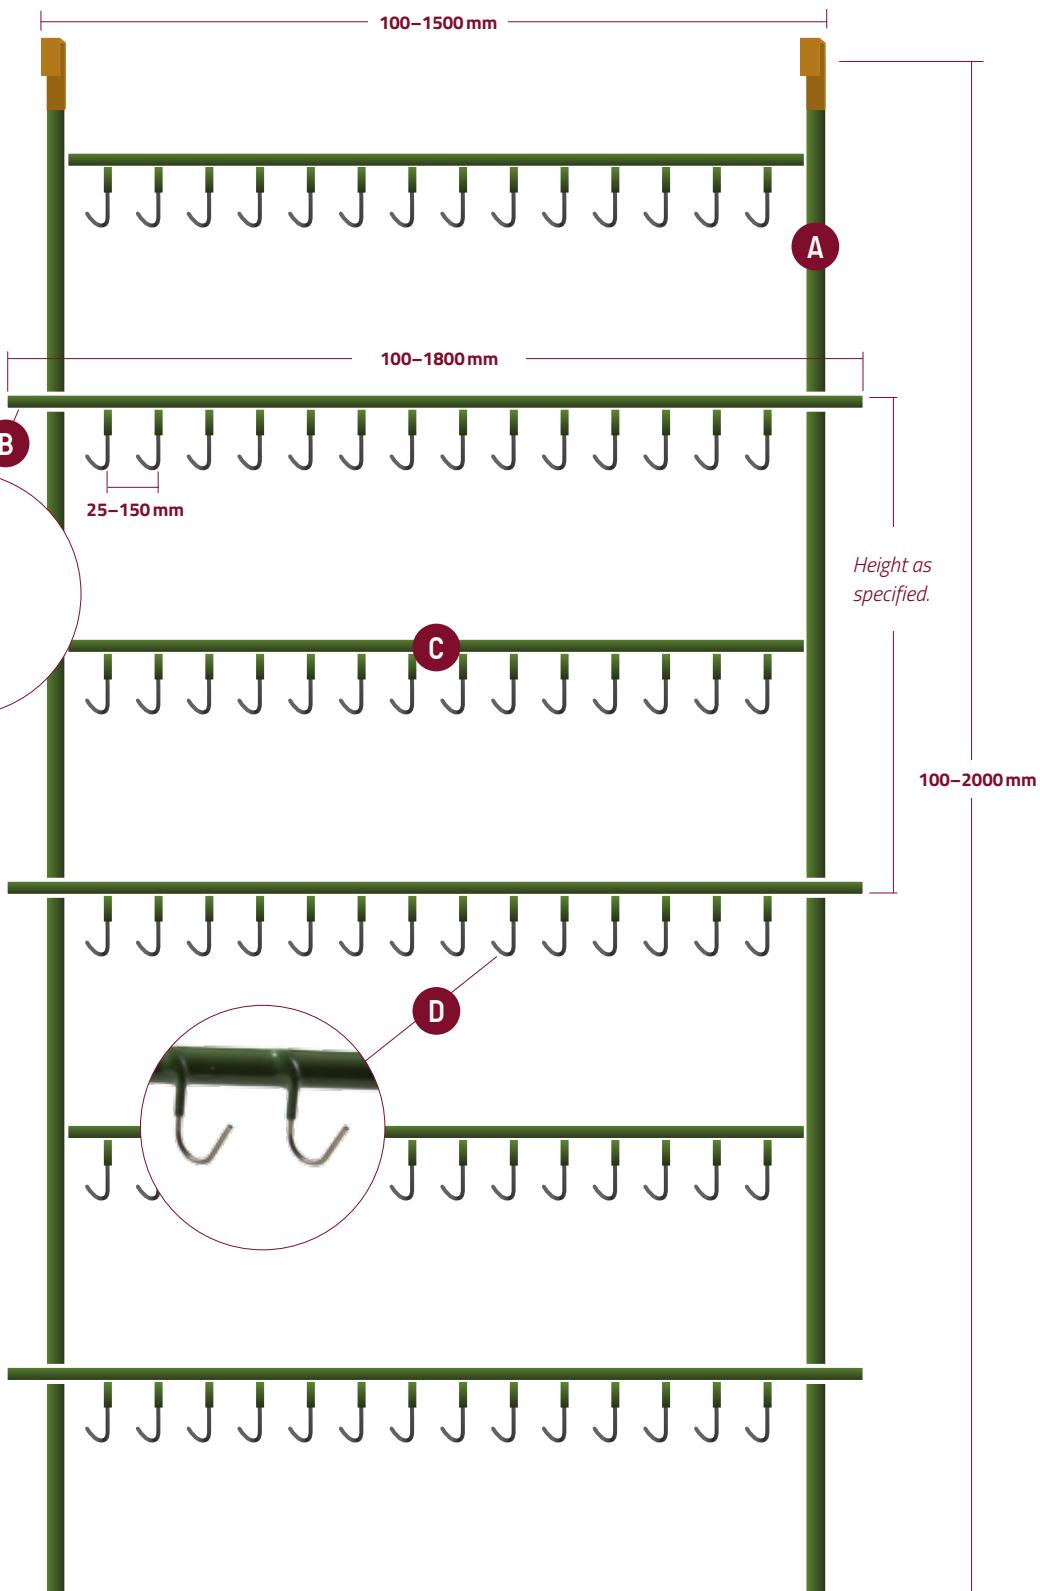

## PERSONAL SERVICE FROM EPIFATECH

At Epifatech we adapt each product to suit specific customer requirements. With a personal contact and ongoing cooperation, we create optimised solutions that cover the entire production process.

*Call us and we'll tell you more about how we work!*

Phone 0371-51 16 85 | [info@epifatech.se](mailto:info@epifatech.se)

**Fixture Head 1**

Fixture head in cast brass with an internal thread (M6-M12) adapted to different types of fixtures.

**Fixture Head 2**

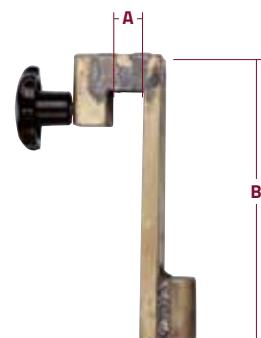

Fixture head in cast brass with an internal thread (M6-M16) adapted to different types of fixtures. Also available with threads in the tongue for locking with a screw or screw knob.

Art. No.	Amm	Bmm
Huvud1	11	130

Art. No.	Amm	Bmm	Cmm
Huvud2	11	150	11

**Fixture Head 3**

Fixture head in wrought brass, adapted to different fixtures for wedge attachment.

**Fixture Head 4**

Fixture head in wrought brass that locks to the rail. The hook is intended for a higher level of electrical conductivity. Available with thread sizes up to M20.

**Fixture Head 5**

Fixture head in wrought brass with eccentric locking to the rail. The hook is intended for a higher level of electrical conductivity. Available with thread sizes up to M20.

Art. No.	Amm	Bmm
Huvud3	66	170

Art. No.	Amm	Bmm
Huvud4	10-20	180

Art. No.	Amm	Bmm
Huvud5	10-20	180

### PLASTIC CLAMP

Epifatech's own plastic clamp is used in electroplating, supplied with or without a titanium tip. Available with different opening widths.

Art. No.	Pcs/box.
PC45	20
PC60	20
PC75	20
PC100	20

### COPPER HOOK

The hardness of the copper material has been produced specifically to suit electroplating.

Art. No.	Dimension	Pcs/box
Cu40x2.0	Kopparkrok 40x2.0	5000
Cu40x3.0	Kopparkrok 40x3.0	2500
Cu50x2.0	Kopparkrok 50x2.0	5000
Cu50x3.0	Kopparkrok 50x3.0	2500
Cu60x2.0	Kopparkrok 60x2.0	5000
Cu60X3.0	Kopparkrok 60x3.0	2500
Cu70x2.0	Kopparkrok 70x2.0	5000
Cu70x3.0	Kopparkrok 70x3.0	2500
Cu80x2.0	Kopparkrok 80x2.0	2500
Cu80x3.0	Kopparkrok 80x3.0	1250
Cu90x2.0	Kopparkrok 90x2.0	2500
Cu90x3.0	Kopparkrok 90x3.0	1250
Cu100x2.0	Kopparkrok 100x2.0	2500
Cu100x3.0	Kopparkrok 100x3.0	2000
Cu120x2.0	Kopparkrok 120x2.0	2500
Cu120x3.0	Kopparkrok 120x3.0	1250
Cu150x2.0	Kopparkrok 150x2.0	2500
Cu150x3.0	Kopparkrok 150x3.0	1250

### COPPER WIRE

Copper wire for suspension and tying of products. Available from stock. The copper wire is wound onto small reels to simplify handling.

Art. No.	Dimension	Weight capacity
Cu0,5	0.5	5 kg/reel
Cu0,7	0.7	5 kg/reel
Cu0,1	1.0	5 kg/reel

### DESIGNED by EPIFATECH

#### COMPLETE LEAD ANODE

Epifatech manufactures complete lead anodes for chrome plating vats. The suspension hook is made from ø16 Cu and is adapted for lifting. Screwed and soldered to the anode. The PVC coating is placed 50 mm down the lead anode. The anode is available in specified lengths.

#### ZINC SPIRAL

Spiral for zinc balls. Thread diameter 6-8 mm

Chrome coating of plastic products.

Product-adapted suspension system for an optimal surface finish at a trivalent chromium plating plant.

OPTIMISED by EPIFATECH

PIPE HANGER

*Customised pipe hanger for zinc and nickel plants.*

PIPE HANGER

*Customised pipe hanger for nickel/chrome.*

TITANIUM BASKET FOR ANODISING

*Optimised titanium basket for anodising of aluminium valve stems.*

HANGER FOR PIPE CONSTRUCTION

*Customer-adapted hanger for pipe construction, nickel/chrome.*

METAL CLAMP

*Metal clamp used for circuit board fixtures and other products.*

SCREW HANGER

*Screw hanger for metal plates and circuit boards.*

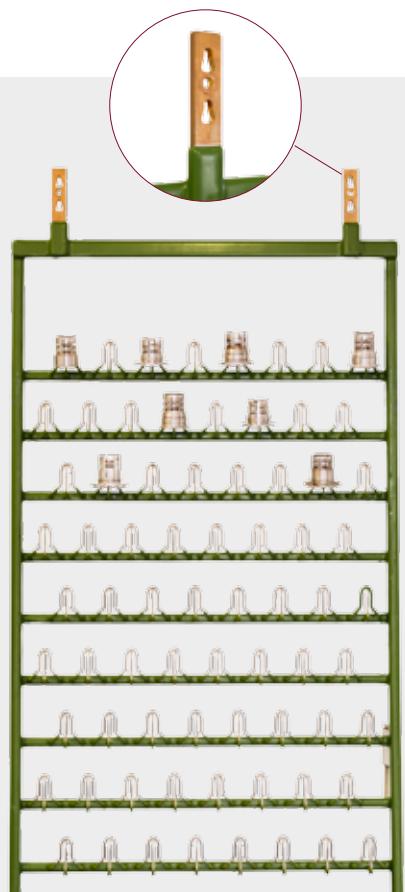

OPTIMISED by EPIFATECH

ADAPTED UNIVERSAL HANGER  
*Universal hanger with four-point clamping.*

PRODUCT-ADAPTED HANGER  
*Product-adapted hanger for metal parts.*

FRAME BRACKET  
*Product-adapted frame bracket for robotised picking and placing. The chosen materials are brass combined with titanium.*

**ROUND ANODISING BASKET**

Titanium basket for zinc balls. Dimensions adapted to requirements.

**A: Hook**

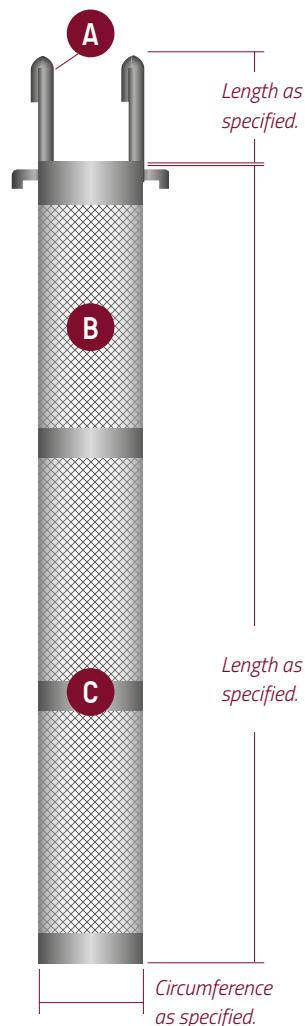

Hook diameter, square, 12 mm.  
Length adapted to requirements.

**B: Metal mesh**

Stretch metal, 1.0 mm.

**C: Reinforcement**

Reinforcement bar, 1.0 x 12 mm.

**RECTANGULAR ANODISING BASKET**

Titanium anode basket. Dimensions adapted to requirements.

**A: Hook**

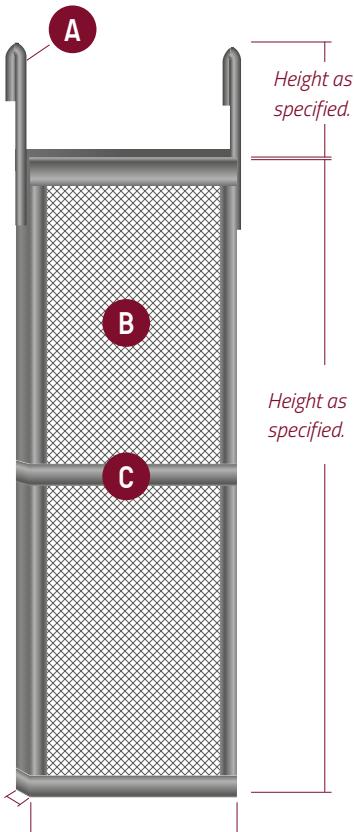

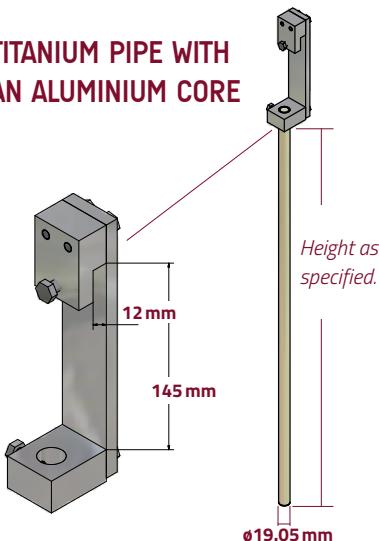

Hook diameter, square, 12 mm.  
Length adapted to requirements.

**B: Metal mesh**

Stretch metal, 1.0 mm.

**C: Reinforcement**

Reinforcement bar, 1.0 x 12 mm.

**TITANIUM PIPE WITH AN ALUMINIUM CORE****FIXED TITANIUM RING**

With a fixed titanium ring you can fasten the parts firmly to ensure stable suspension.

**AXLE RING**

The axle ring is used for easy fastening of screws and axles.

**METAL FINGER RING**

The metal finger ring is used to fasten the parts and can be combined with the fixed titanium ring or the double metal finger ring.

### DOUBLE METAL FINGER RING

The double metal finger ring is used to fasten the parts firmly and can be combined with the fixed titanium ring or the metal finger ring.

Art. No.	Span	Wire thickness mm
DPFR1	20+20	1.2
DPFR2	30+30	1.2
DPFR3	20+20	1.6
DPFR4	30+30	1.6

### SPRING RING

The spring ring is used when parts need to be fastened firmly and is available with a customer-specified spring design.

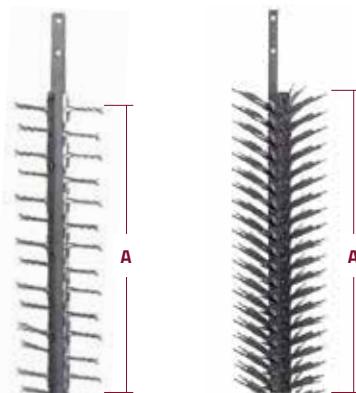

Art. No.	Wire thickness mm
FJR1	1.2
FJR2	1.2

### INTERNAL TENSION RING

Clamping ring used to fasten the parts easily between the springs.

Art. No.	Span	Wire thickness mm	Angle
ISR1	20	1.6	45°
ISR2	20	1.6	Straight
ISR3	30	1.6	45°
ISR4	30	1.6	Straight
ISR5	20	3.0	45°
ISR6	30	3.0	Straight
ISR7	20	3.0	Straight
ISR8	30	3.0	45°
ISR9	20	5.0	45°
ISR10	30	5.0	45°
ISR11	20	5.0	Straight
ISR12	30	5.0	Straight

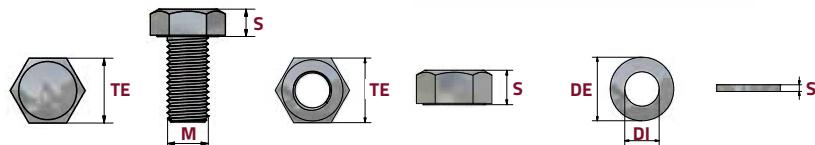

### UNIVERSAL HANGER

Universal hanger for internal and external suspension. Available with a range of angles and designs.

Art. No.	Amm
V-32-2	635
V-48-2	915
V32-4	615
V48-4	615

### TITANIUM SCREWS AND NUTS

In addition to the standard table sizes, titanium screws and nuts can be supplied according to a specified size, length and design.

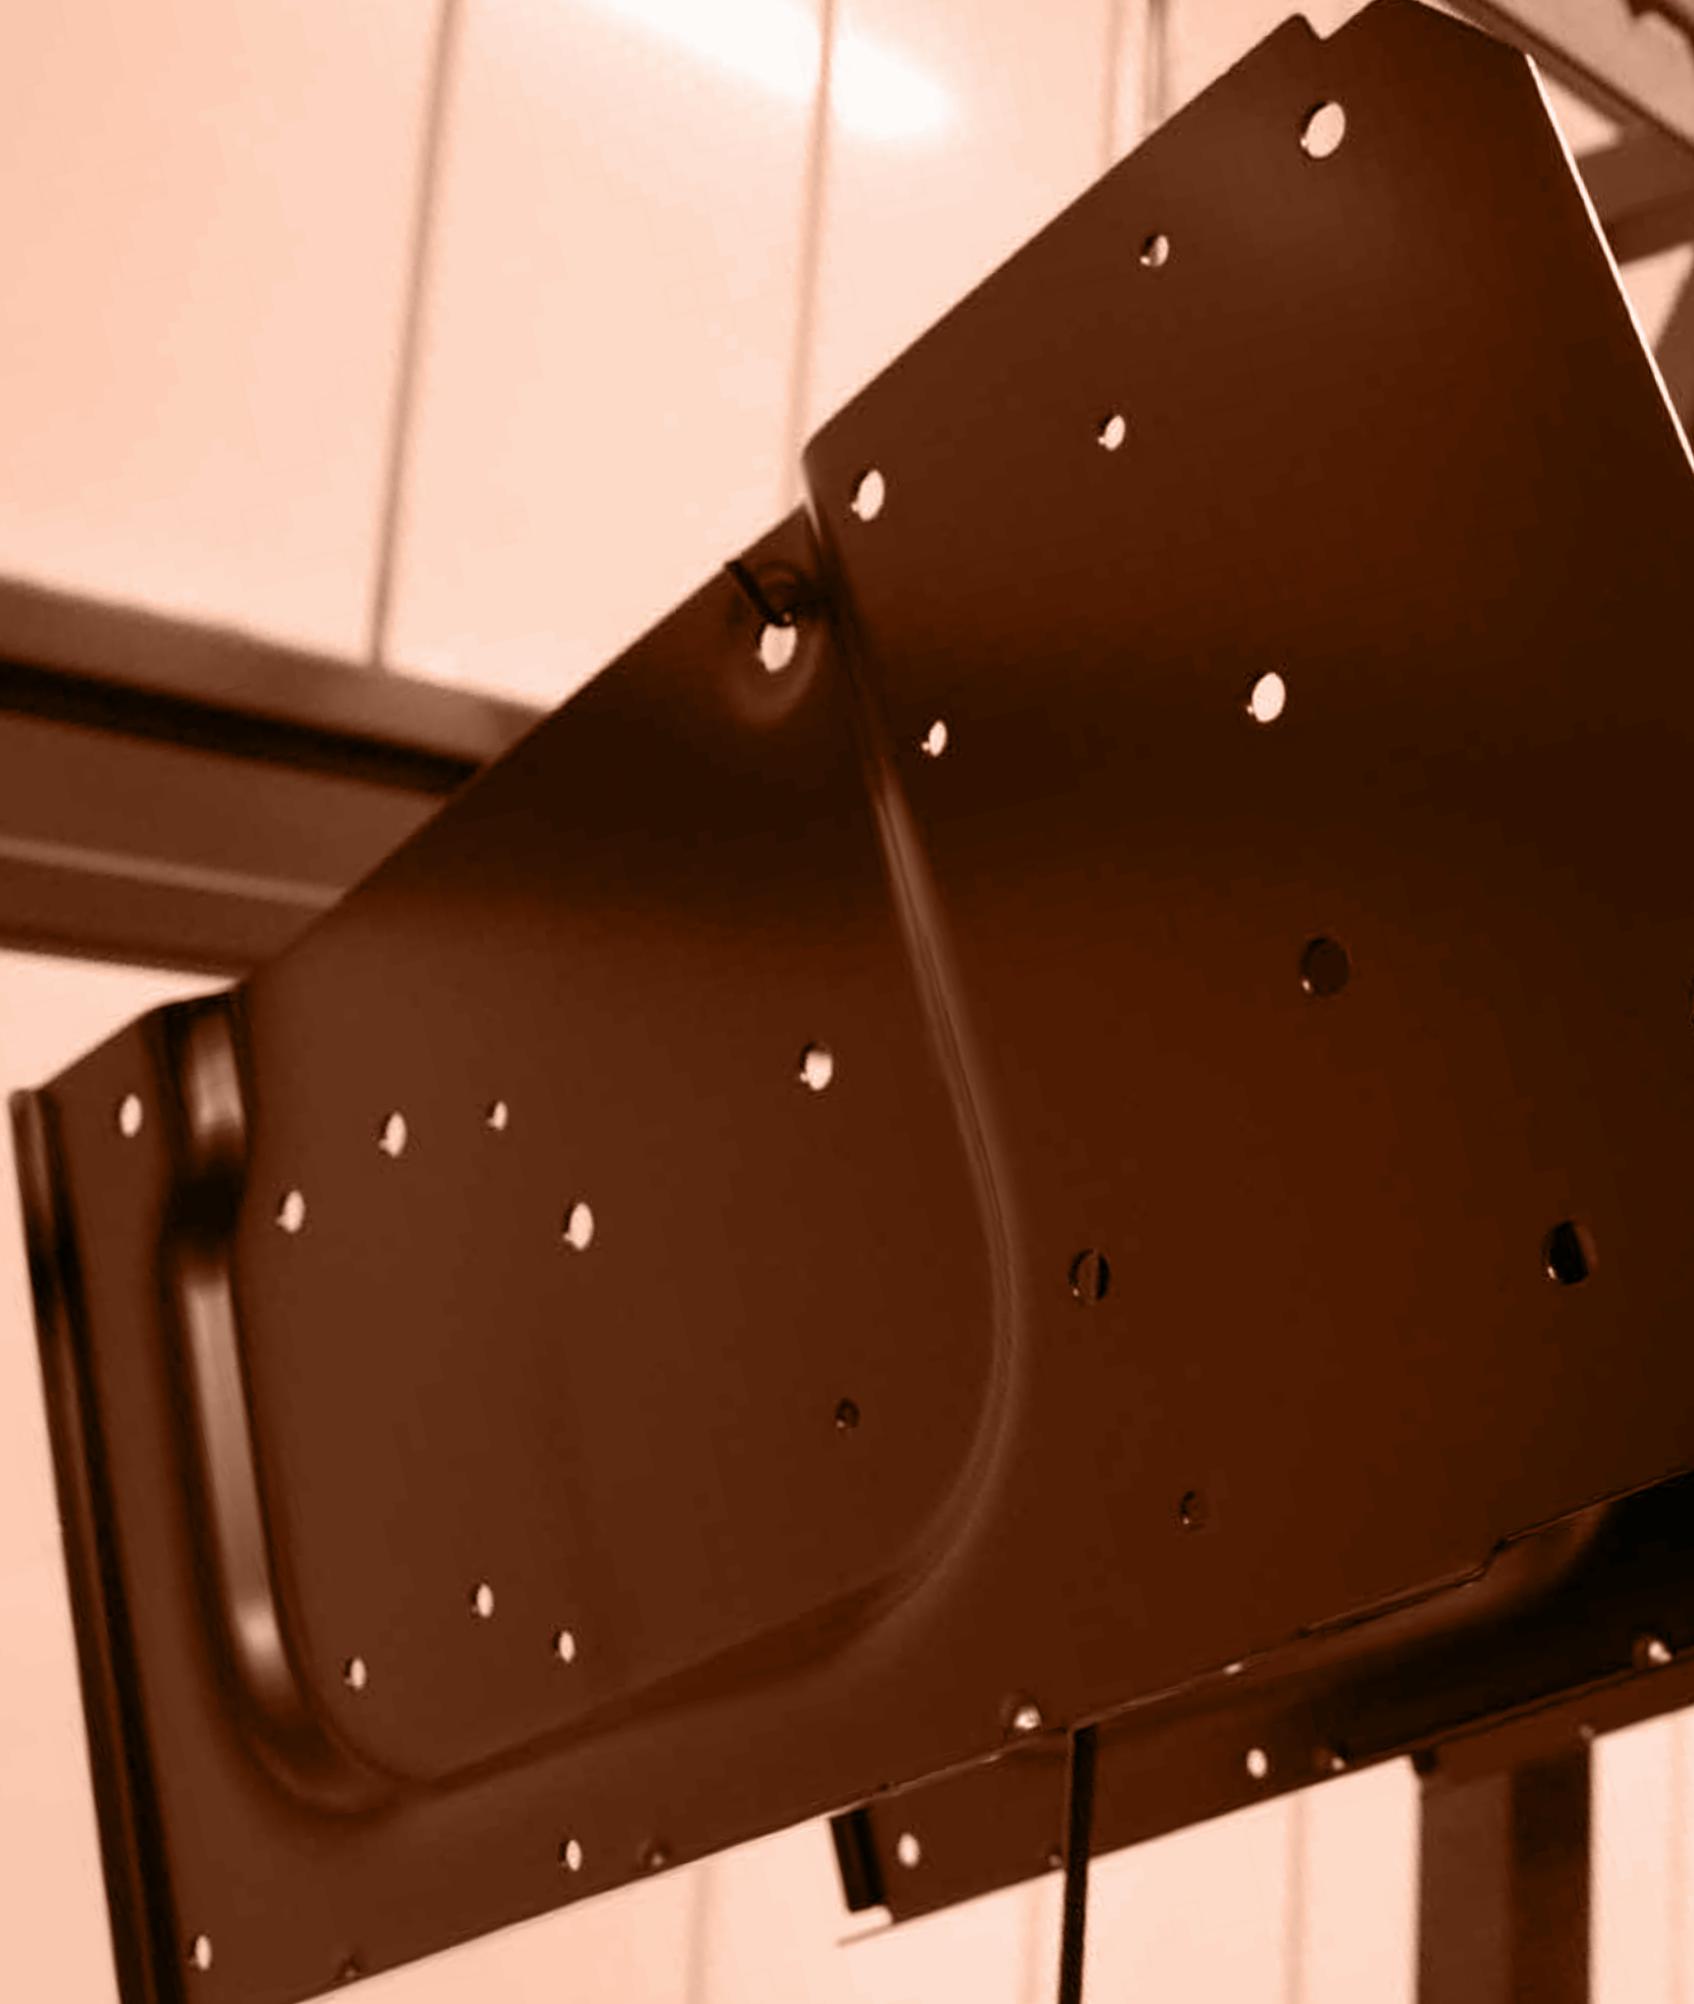

Art. No.	DIN 933		DIN 934		DIN 125			
	Size	TE	S	TE	S	DE	DI	S
M4	7	2.8		7	3.2	9	4.3	0.8
M5	8	3.5		8	4	10	5.3	1
M6	10	4		10	5	12.5	6.4	1.6

M10	17	7		17	8	21	10.5	2
M12	19	8		19	10	24	13	2.5
M14	22	9		22	11	28	15	2.5

### BRACKETS FOR TITANIUM RINGS

Titanium brackets for rings with an axle diameter of 20 mm. Also available in specified sizes.

Art. No.	
FST1	U -shaped external bracket
FST2	U-shaped internal bracket
FST3	Screw M8x25
FST4	M8 bolt
FST5	M8 with washer

# Powder coating

26–39

## UNIVERSAL SUSPENSION SYSTEM

Our universal suspension system for powder coating can be adapted to specific production requirements. Several different struts are available to fit the suspension system and they are easily changed.

### A: Suspension system frame

The frame for the system is available according to the desired width and length.

### B: Strut bracket

The struts are attached at both ends, making the system stable and durable. The brackets are mig-welded to ensure optimal service life and are not affected by burning.

### C: Strut for universal suspension system

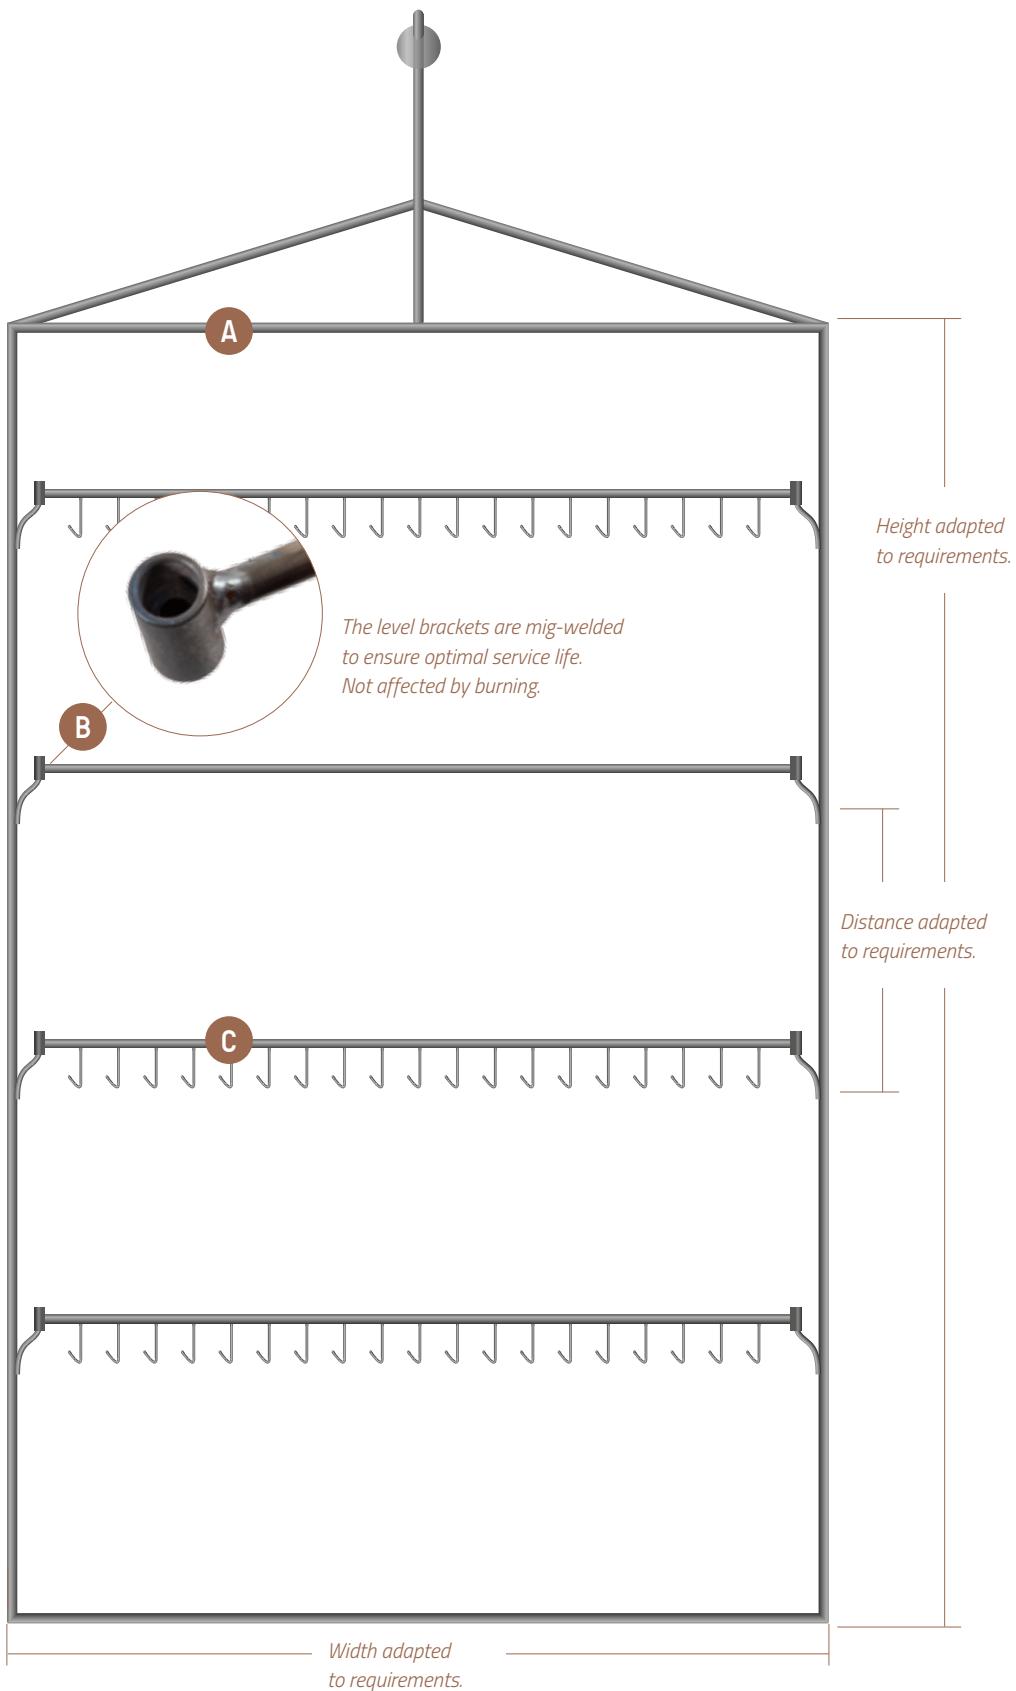

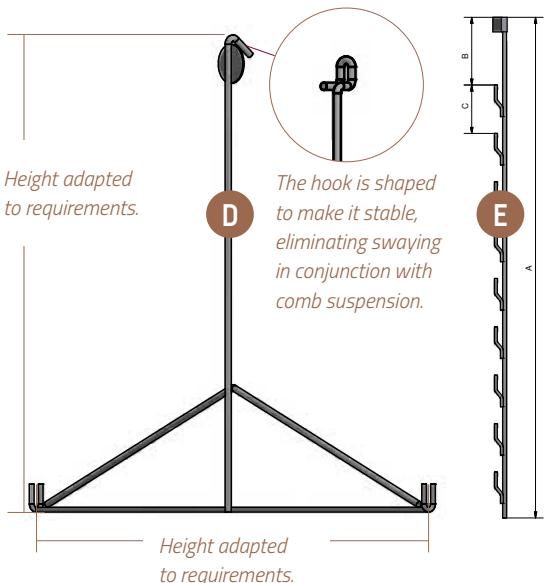

We have several different struts that can be easily adapted to suit different requirements. See strut model range on page 30.

### D: Removable frame system

A suspension attachment for removable frame sides. The system has been produced to ensure the best possible storage arrangement, reducing the amount of storage space required. Also an advantage during transport.

### E: Removable sides

The frame sides are available in different lengths and with different sections. Easy to store, they take up minimal space even when being transported.

## SIMPLIFIED SUSPENSION SYSTEM

A flexible, time-saving suspension system. The simple suspension of the strut allows hooks to be changed rapidly and cost-effectively. This suspension system is particularly suited to larger volumes.

### A: Stem for simplified suspension system

A flexible system that is available in a desired length and specified number of levels.

### B: Disc

The disc is welded in place, preventing the hanger from swaying and ensuring that it remains steady throughout the whole process. The disc can also be labelled with article numbers, bar codes etc.

### C: Bracket for simplified suspension system

A simple bracket to facilitate strut changes. The bracket design is patented.

### D: Strut for standard suspension system

We have a range of struts that can be easily adapted to different requirements. For details of the strut models, see page 31.

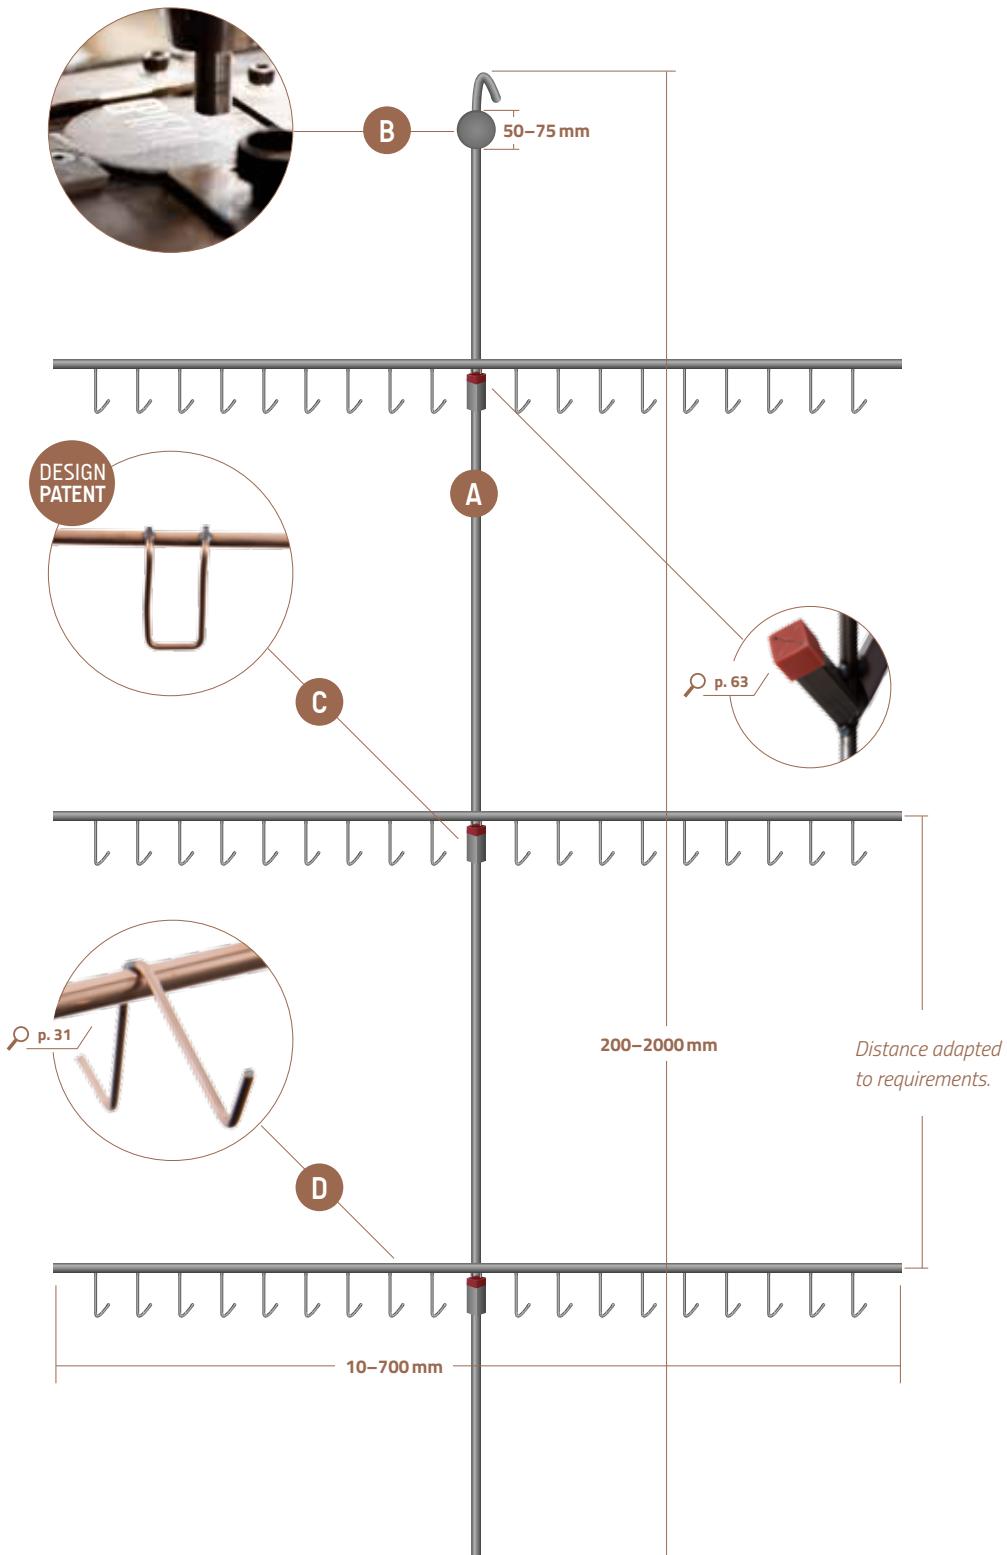

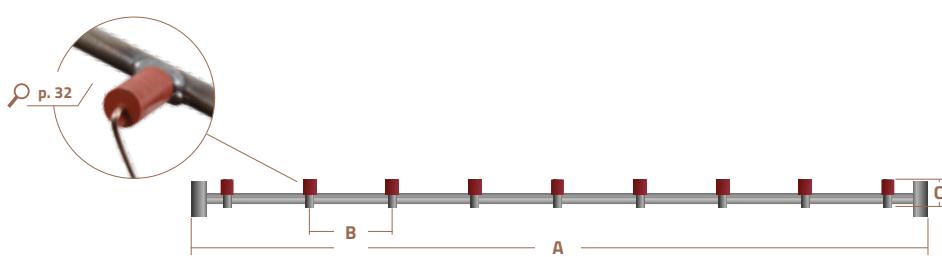

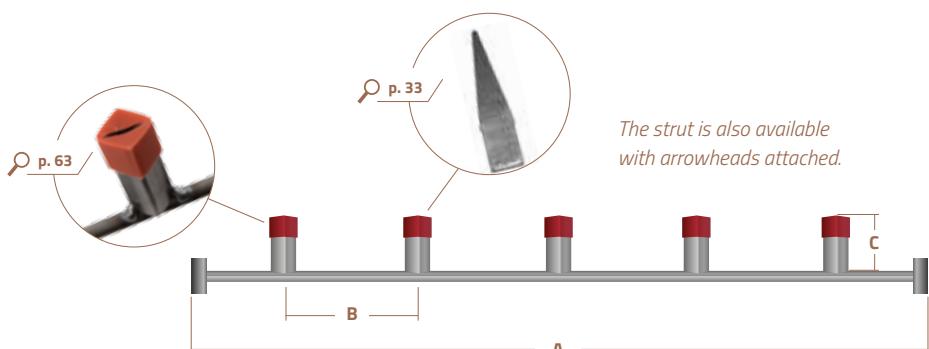

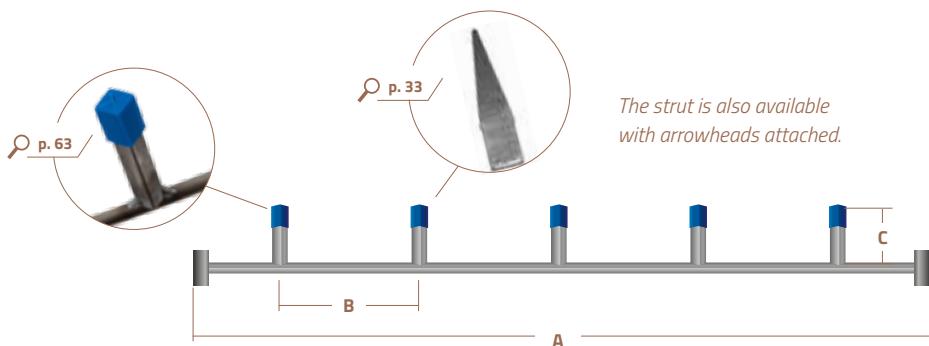

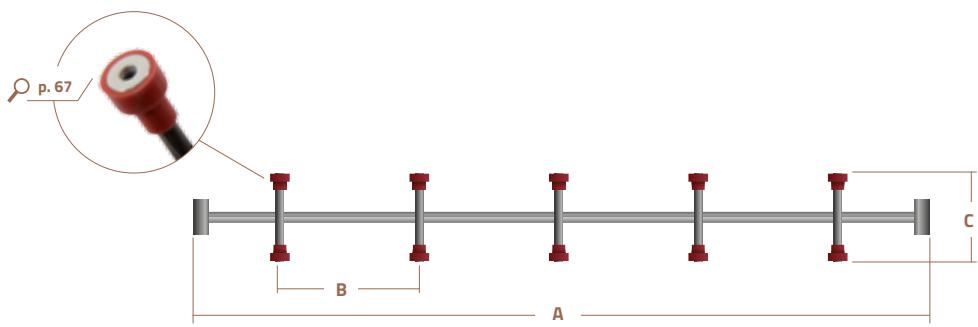

## PERSONAL SERVICE FROM EPIFATECH

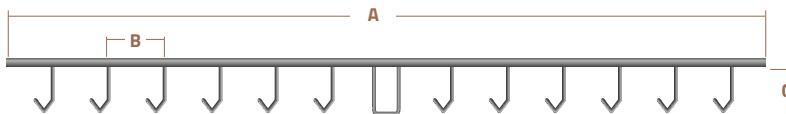

At Epifatech we adapt each product to suit specific customer requirements. With a personal contact and ongoing cooperation, we create optimised solutions that cover the entire production process.

*Call us and we'll tell you more about how we work!*

*Phone 0371-51 16 85 | info@epifatech.se*

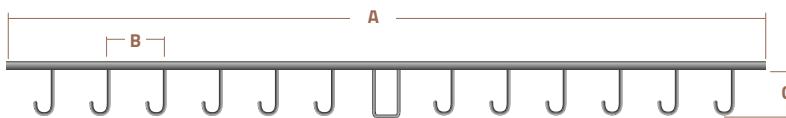

**STRUT 1**

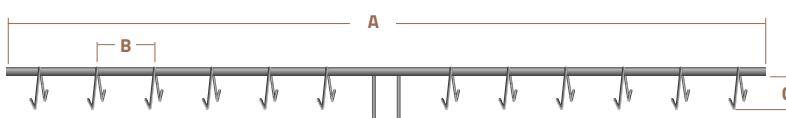

Strut with a double bent hook.

Art. No.	A mm	B mm	C mm
EPI-STG1	300–800	25–150	50

**STRUT 2**

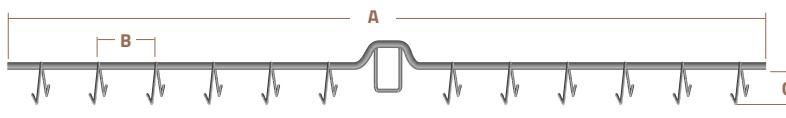

Strut with a round hook.

Art. No.	A mm	B mm	C mm
EPI-STG2	300–800	25–150	50

**STRUT 3**

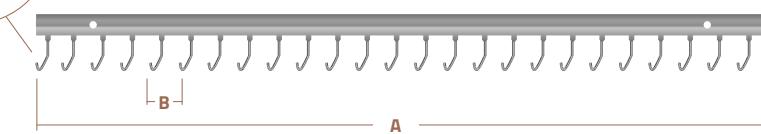

Strut for the simplified suspension system with a double hook for suspension on both sides.

Art. No.	A mm	B mm	C mm
EPI-STG3	300–800	25–150	50

**STRUT 4**

Strut for the simplified suspension system with a centred strut and double hook for suspension on both sides.

Art. No.	A mm	B mm	C mm
EPI-STG4	300–800	25–150	50

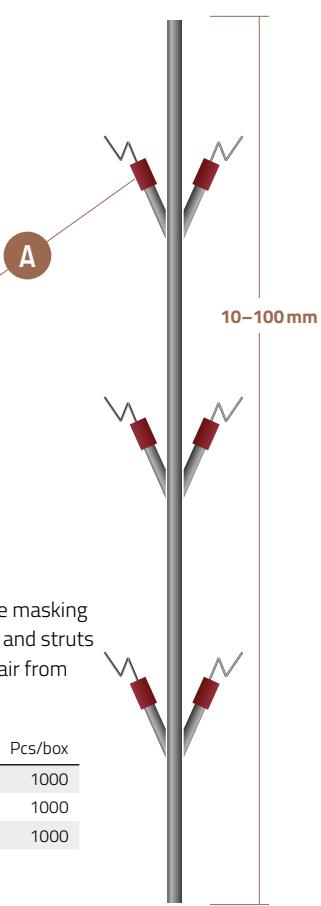

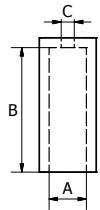

**FLEXIBLE METAL HOOK**

A cost-effective metal hook in 1.0 mm metal for flexible suspension of small parts in large volumes. Can be used separately or as part of a suspension system.

Art. No.	A mm	B mm
EPI-PLK	500	25

## SUSPENSION STRUT

A smaller version of the suspension system where the hooks are inserted directly into the rubber bracket. The hooks can be easily changed, making the system extremely adaptable.

### A: Silicone sleeve for steel tube

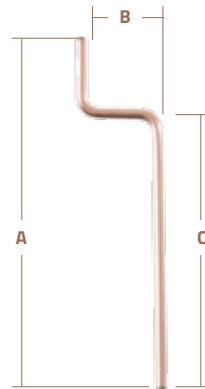

In addition to the suspension strut, steel sleeve masking can be used for suspension systems (page 28) and struts (page 30). The sleeve has a flat top to prevent air from entering and to avoid fluid accumulation.

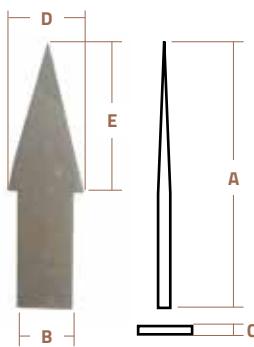

Art. No.	Amm	Bmm	Cmm	Pcs/box

STAINLESS STEEL METAL CLAMP

Can clamp onto an axle or a flat surface,  
e.g. metal sheet.

Art. No.	Amm	Bmm	Cmm
PKRO	85	40	1

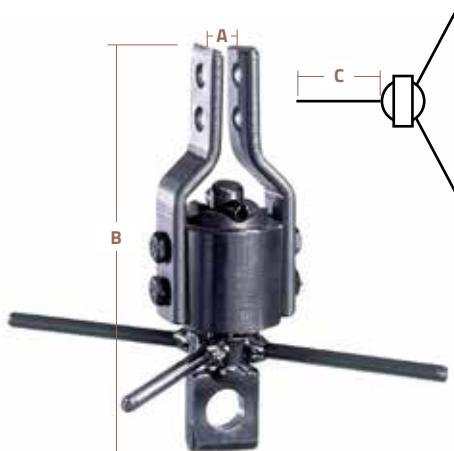

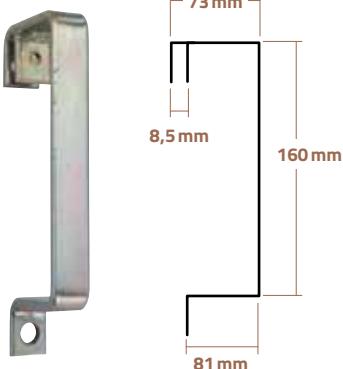

## CONVEYOR COMBS

Our different conveyor combs are available in a range of designs and dimensions based on requirements or adapted to existing systems. The image to the right shows a number of examples of the designs we have supplied.

## COMB HOOK

Art. No.	Amm	Bmm	Cmm	Dmm	Emm	Fmm	Gmm
KAMKROK	74	4	29	20	19.5	30	16

## CONVEYOR HOOK

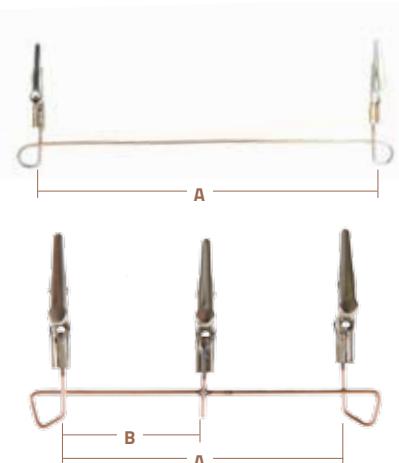

A link hook from conveyor to comb.

## ROTATING CONVEYOR HOOK

A rotating head with stop points at 90° intervals.  
Can be fitted to a conveyor or operated manually.

Art. No.	Wire diameter mm	Weight capacity
CONVK	6	150 kg

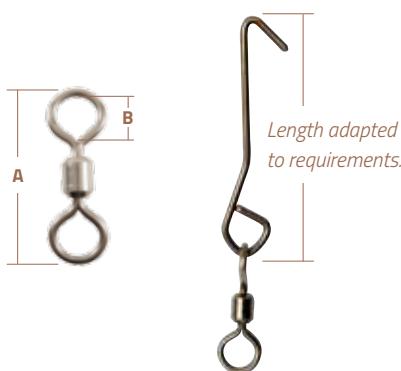

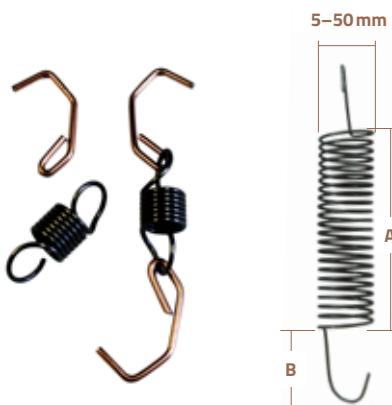

Art. No.	Amm	Bmm	Cmm	Weight capacity
ROTH	8	150	70	100 kg

## CROCODILE CLAMPS

For attaching vertically suspended profiles. Allows the desired distance between the profiles to be maintained.

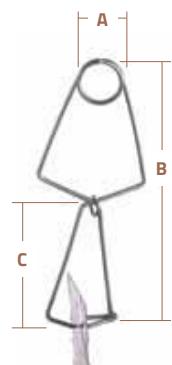

Art. No.	Amm	Bmm
2KL100	100	
2KL133	133	
2KL150	150	
2KL200	200	
3KL100	100	50
3KL133	133	66.5
3KL150	150	75
3KL200	200	100

## TENSION SPRING

A tension spring is fitted to the bottom of universal frames for attachment of light parts. Also available in desired dimensions.

Art. No.	Amm	Bmm	Wire diameter
DRF1	25	30	1.5
DRF2	50	50	1.5
DRF3K	25	30	2.0
DRF4	50	50	2.0

## CLAMP SPRING

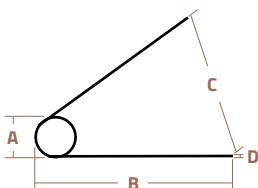

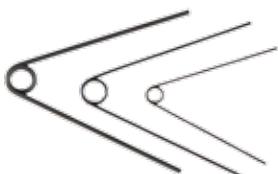

A clamp spring for external tension mounting of aluminium profiles.

Art. No.	Amm	Bmm	Cmm
PROFKL	40	220	100

## ROTATING LINK

This simple rotating link is used to rotate a product. Available with or without a hook attached.

Art. No.	Amm	Bmm	Pcs/box
VL1	55	13	100

## TENSION SPRING

Tension springs for internal suspension.

Art. No.	Amm	Bmm	Cmm	Dmm
SPÄNN1,5	7.5	78.0	63.0	1.5
SPÄNN2,0	11.8	103.0	86.0	2.0

GH-M20x25	25	18	20	25
GH-M24x25	25	20	24	25

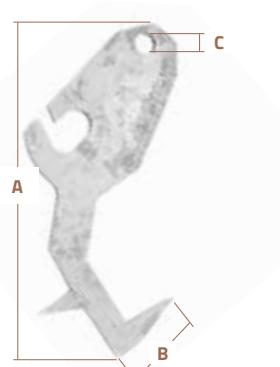

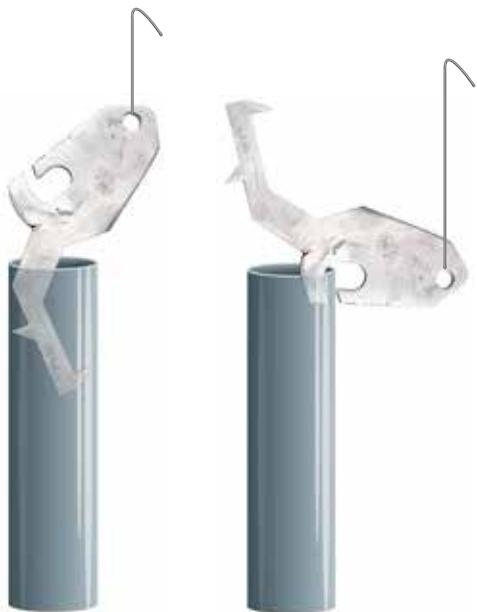

## RING SCREW

Screwed in and suspended through the eye.

Art. No.	Amm	Bmm	Cmm	Pcs/box
RS-M3x10	10	5	3	500
RS-M4x10	10	6	4	400
RS-M5x10	10	8	5	200
RS-M6x10	10	10	6	100
RS-M8x15	15	12	8	100
RS-M10x20	20	14	10	100
RS-M12x20	20	16	12	25

## METAL CLAMPS FOR INTERNAL SUSPENSION

Universal clamps for suspension of pipes and sheet metal. Pipe dimensions 18-35 mm, sheet metal thickness 3.5 mm. Available from stock.

## UNIVERSAL CLAMP UNIV1

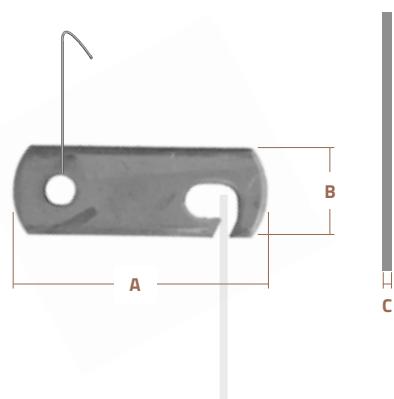

Universal clamp for internal suspension of pipes.

Art. No.	Amm	Bmm	Cmm	Pcs/box
UNIV1	100	15	6.5	500

## UNIVERSAL CLAMP UNIV2

Universal clamp for internal suspension of pipes.

Art. No.	Amm	Bmm	Cmm	Pcs/box
UNIV2	100	25	6.5	500

## CLIP

Universal clamp for internal suspension of pipes.

Art. No.	Amm	Bmm	Cmm
CLIPS1	71	25	3
CLIPS2	71	25	1.5

## UNIVERSAL CLAMP UNIV3

Universal clamp for internal suspension of pipes.

Art. No.	Amm	Bmm	Cmm	Pcs/box
UNIV3	100	32	6.5	500

## UNIVERSAL CLAMP UNIV4

Universal clamp for internal suspension of pipes.

Art. No.	Amm	Bmm	Cmm	Pcs/box
UNIV4	100	16	6.5	500

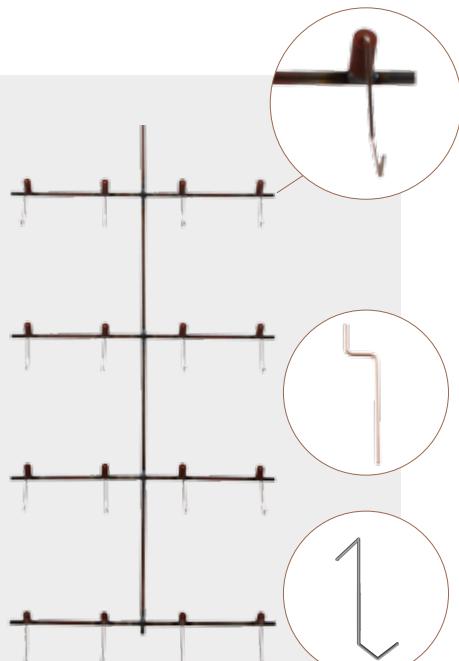

OPTIMISED by EPIFATECH

SPECIAL ATTACHMENT FOR WHEEL RIMS

*Adapted to ensure the smallest possible hanging mark.*

PRODUCT-ADAPTED HANGER

*Product-adapted hangers with built-in masking.*

UNIVERSAL HANGER

*A universal hanger with exchangeable hooks. Allows the same hanger to be used with, for example, the Z-hook and standard hook.*

WIRE HANGER

*Wire hangers for wheel rims for reduced hanging mark.*

TOWBAR SUSPENSION

*Suspension of towbars with internal masking.*

## STORAGE SYSTEMS

Storage carts are manufactured according to the specific needs and wishes of the customer. We always use standard dimensions for EUR-pallets as a basis, making the carts easy to store and transport.

### A: Bottom frame in standard dimensions

The base on which the frame is built is always 1200×800 mm to fit a normal EUR-pallet.

### B: Side pillars

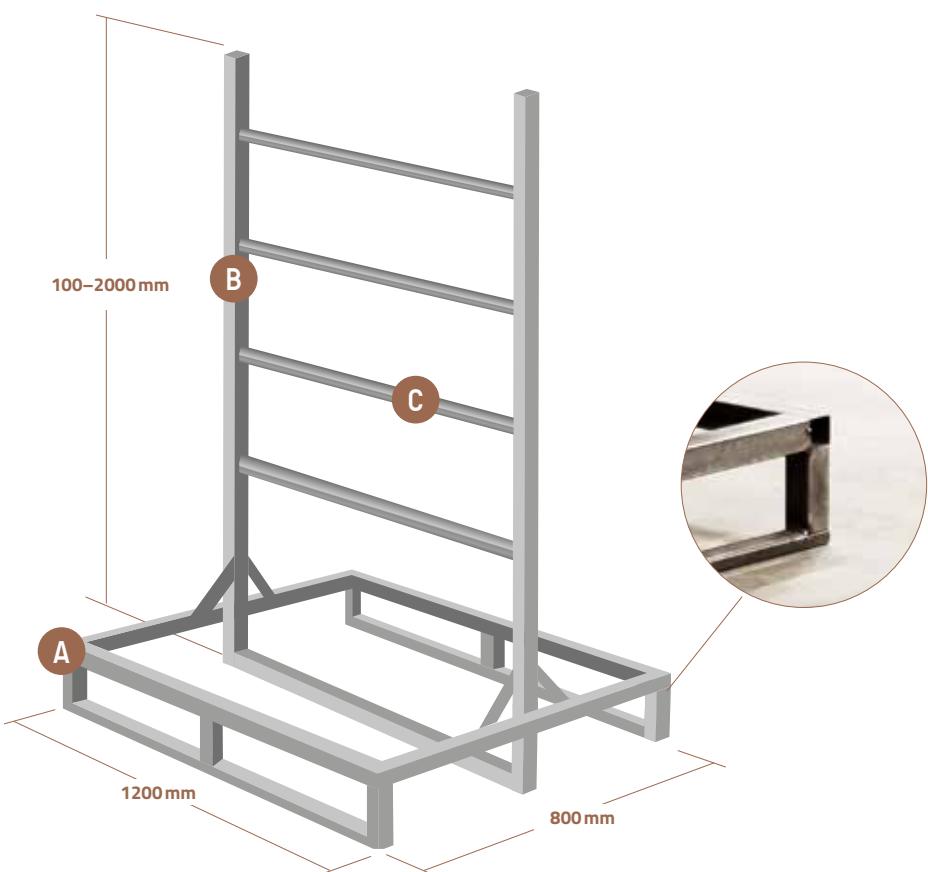

The height of the side pillars can be adapted depending on how/where the cart will be used and the available storage space.

### C: Adapted strut

Struts are adapted entirely in line with the product that is to be stored on the cart.

### D: Washing basket

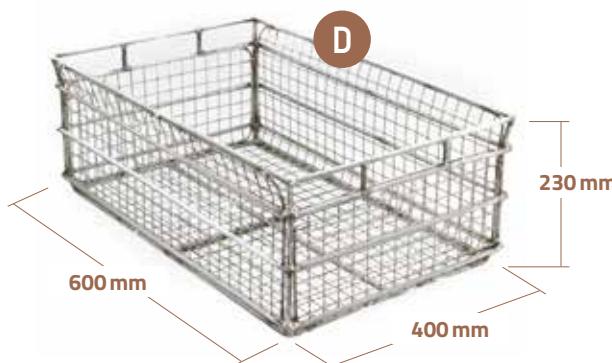

Washing basket in stainless, acid-proof material. The mesh openings are 15 mm and are made of 2.0 mm acid-proof wire.

## PERSONAL SERVICE FROM EPIFATECH

At Epifatech we adapt each product to suit specific customer requirements. With a personal contact and ongoing cooperation, we create optimised solutions that cover the entire production process.

*Call us and we'll tell you more about how we work!

Can hold  
up to  
**1 tonne**

Rationalised production with an optimised storage system from Epifatech.

A close-up photograph of a person's hand wearing a white nitrile glove. The hand is gripping a single metal hook, which has a sharp, curved hook end and a straight shank. The background is a solid, dark color.

# Hooks 40-49

**HOOK 1 | 0-270°**

Apart from the standard version, the hooks are also available with a specified angle. All at no extra cost. We also accept orders for other end versions with, for example, radiiuses, zero angles etc. The final digit in the article number indicates the length of the hook (50-1200 mm).

## TUMBLING MACHINE

A cleaning machine for silicone plugs. The plugs are tumbled. No chemicals are used – just water and stone chips. Environmentally friendly.

Art. No.	Capacity L	Height mm	Width mm	Depth mm	Weight kg	Output kW	Input volt/ampere
MT1 VT	5 eller 11	420	340	340	20	0.2	230/0.9

## SILICONE PRODUCTS

Here you will find our different silicone profiles. The silicone profiles are sold by the metre.

### 1. Silicone strip

Used for edge masking of metal constructions.

### 2. Silicone profile

Rectangular silicone profile. Customised.

### 3. Silicone foam

For masking of e.g. gaps between metal plates. Square or round.

### 4. Silicone bar

A solid bar, supplied in 25 m rolls. Available in diameters of 2–20 mm. Square version also available.

### 5. Silicone mat

Can be used for e.g. protection between two parts to avoid adhesion. Can also be used in the production of different profiles in smaller quantities. The mat is available in thicknesses of 1–8 mm

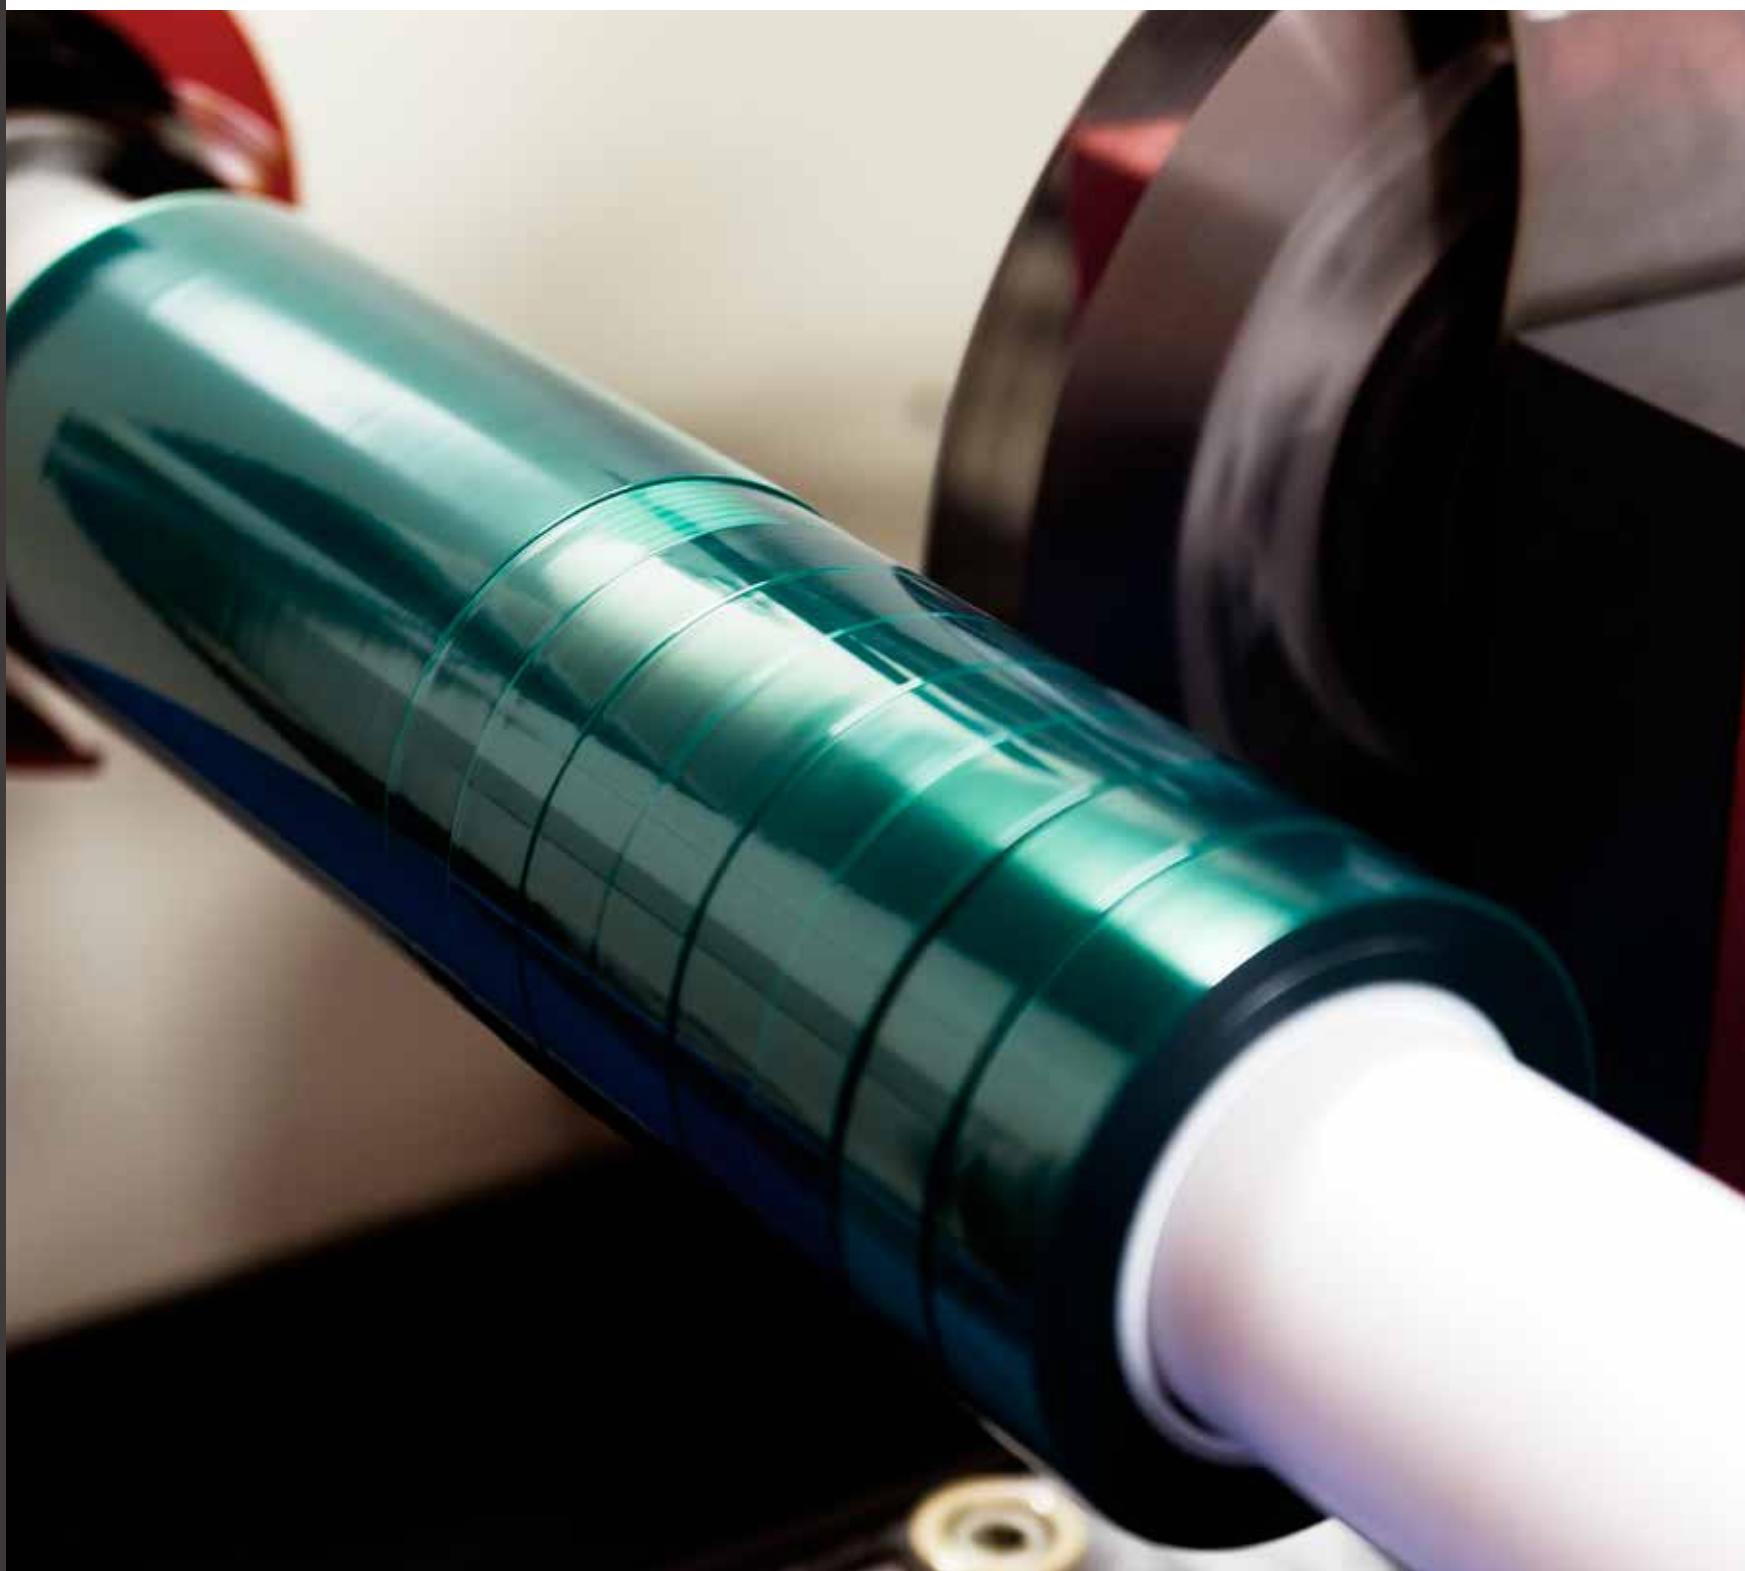

Art. No.	Thickness mm
Silmat 1.0	1.0
Silmat 1.5	1.5
Silmat 2.0	2.0
Silmat 3.0	3.0
Silmat 4.0	4.0
Silmat 5.0	5.0
Silmat 6.0	6.0
Silmat 8.0	8.0

Masking tape  
74-85

TAPE / MASKING

## TAPE

Our tapes are available in different colours and designs. The tape rolls are cut according to your wishes in widths of 3–1000 mm.

### TAPE GREEN 210

Can be used at temperatures up to 220°C for approximately 25 minutes. Used in pre-preparation and for other purposes. Retains its function when cooled or heated. Also available with transparent adhesive.

Thickness **0,089 mm**

Breaking point **60%**

Adhesion to metal **800g.n. per 25 mm width**

### TAPE WHITE 200

A paper tape with a silicone adhesive. The tape is easy to tear off during application. Used mostly in conjunction with wet painting.

Thickness **0,175 mm**

Breaking point **10%**

Adhesion to metal **550g.n. per 25 mm width**

### TAPE BROWN 260

Tape 260 can be used at temperatures up to 370°C for short periods and at temperatures as low as -80°C. Resistant to a large number of solutions and pretreatment chemicals.

Thickness **0,065 mm**

Breaking point **50%**

Adhesion to metal **600g.n. per 25 mm width**

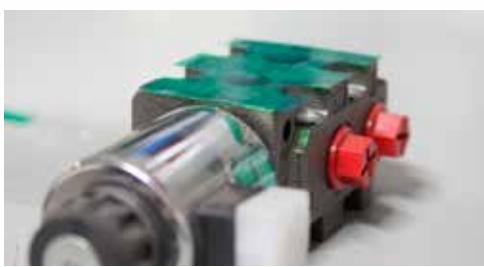

### TAPE BLUE 180

Same features as tape 210 green but more flexible, making it easier to mask irregular or uneven areas such as edges.

Thickness **0,068 mm**

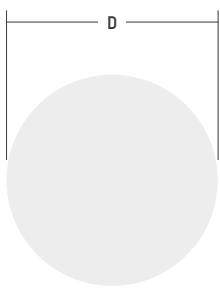

TAPE DISCS / MASKING

*Our tape can also be  
specially cut for masking  
specific shapes and areas.*

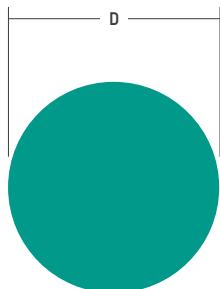

*A slit backing strip makes it easier  
to remove the tape discs.*

**TAPE DISCS WHITE 200°C**

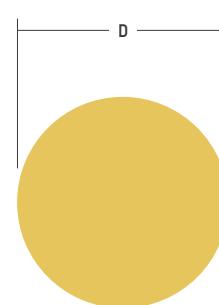

These transparent tape discs can also be ordered in a specified size. The discs are also available with a slit backing strip for easy removal.

**LEAD TAPE SILVER**

Lead tape is used for masking or as a moisture barrier in conjunction with chemical stripping and galvanising. The tape has excellent pliability and is heat resistant. The special adhesive prevents the tape from lifting at the edges.

Art. No.	Width mm	Maximum temp. °C	Metres/roll
LFT	6-500	110	33

**ALUMINIUM TAPE SILVER**

Aluminium tape can be used for masking in conjunction with galvanising. The adhesive can withstand high temperatures and can be used at temperatures up to 260°C

Art. No.	Width mm	Maximum temp. °C	Metres/roll
ALT	6-500	160	50

**FIBREGLASS TAPE WHITE**

Fibreglass tape can withstand temperatures up to 260°C and is extremely pliable, making it easy to apply around edges. Can be used in conjunction with e.g. powder painting and blasting.

Art. No.	Width mm	Maximum temp. °C	Metres/roll
GCL	5-500	260	33

**CREPE TAPE**

Crepe tape is often used in conjunction with wet painting. Available in two versions – one that can withstand temperatures up to 60°C and another that can withstand temperatures up to 200°C. The thinness of the paper makes it easy to remove after finishing has been completed.

Art. No.	Width mm	Maximum temp. °C	Metres/roll
CRT60	5-500	60	33
CRT200	5-500	200	33

**BLAST TAPE WHITE**

Blast tape is a special tape that has been developed to offer strong protection in conjunction with sand blasting and shot blasting.

Art. No.	Width mm	Maximum temp. °C	Metres/roll
BLT	5-500	100	33

**VINYL TAPE**

Vinyl tape is resistant to acid, sun, water etc. It adheres particularly well to metal and plastic and is easy to apply due to its pliability.

Art. No.	Width mm	Maximum temp. °C	Metres/roll
<b>VNT12,7x33</b>	12.7	300	33
<b>VNT19,1x33</b>	19.1	300	33
<b>VNT25,4x33</b>	25.4	300	33
<b>VNT38,1x33</b>	38.1	300	33
<b>VNT50,8x33</b>	50.8	300	33

**SELF-VULCANISING SILICONE TAPE**

This tape is extremely flexible and is particularly suitable for uneven surfaces. On application, the tape stretches around the product and is applied overlapping, ensuring very compact masking. Can withstand temperatures up to 300 °C.

Art. No.	Width mm	Maximum temp. °C	Metres/roll
<b>SSFT</b>	25	300	11
<b>SSFT</b>	38	300	11
<b>SSFT</b>	50	300	11

**TAPE WITH ADHESIVE-FREE CENTRE SECTION**

Used, for example, for long products. Simplifies application and removal as the adhesive surface is minimised. Also prevents adhesive from coming into contact with double-coated surfaces. The tape is also available punched with different profiles according to requirements.

Art. No.	Width mm	Maximum temp. °C	Metres/roll
<b>TMAM</b>	100–500	220	66

**LINER TAPE**

Tape for cutting on a plotter.

Art. No.	Width mm	Maximum temp. °C	Metres/roll
<b>TML</b>	100–1000	220	66

**AUTOMATIC TAPE DISPENSER M-1000**

After a piece of tape has been removed, a new piece appears automatically. The size can be seen clearly on the display and it is extremely easy to change. If a longer piece of tape is required, simply hold down the forward button until you have the desired length.

Art. No.	Dimensioner mm	Weight kg	Label width range mm	Label length range mm
<b>M-1000</b>	137x218x150	3	7–50	5–999

**TAPE DISPENSER AL 1150D**

Ideal for small labels and small spaces. Fitted with a photosensor that is both accurate and reliable. Automatically detaches paper, vinyl, polyester, foil etc. from its liner. Winds in the liner automatically for a tidier working environment. No tools are required to change to a different width or length. No maintenance required. The motor can also handle larger rolls. The core and reel size need to be a minimum of 50 mm ID and a maximum of 250 mm UD.

Art. No.	Dimensioner mm	Weight kg	Label width range mm	Label length range mm
<b>AL 1150D</b>	210x210x220	5	6–140	4–200

**TAPE DISPENSER ZCUT-2**

Permits up to 20 pieces of tape with a single press of a button. Ideal for several users at the same time. Safety button on the lid.

Art. No.	Dimensioner mm	Weight kg	Label width range mm	Label length range mm
<b>ZCUT-2</b>	300x165x170	3.5	7–50	13–60

## Terms and conditions of sale

*Terms and conditions of payment are 30 days net from the invoice date. We use electronic invoicing. Welded fixtures that are manufactured are saved for three years after the final delivery unless agreed otherwise. Delivery: Ex works.*

# EPIFATECH®

*makes surface to content*

When choosing suspension and masking technology, we are your obvious partner. Extensive experience and commitment built up over decades have made us a unique team member when it comes to surface finishing optimisation. We have evolved into a global company with representatives in several countries and with our own European sales and distribution system.
